Modon

The Saudi Authority for Industrial Cities and Technology Zones (MODON) develops and manages industrial cities across Saudi Arabia, supporting Vision 2030 by promoting industrial growth, innovation, and economic diversification. It provides infrastructure and services to attract investment in manufacturing, logistics, and technology. Bringing together government and the private sector, Modon develops industrial cities to stimulate sustainable economic growth.

Cybersecurity partner

Modon selected Kaspersky for its team's expertise, broad service offerings, and commitment to high-quality results.

Ensuring uncompromised security

As a key player in Saudi Arabia's industrial sector, Modon is a prime target for cyber threats from both commercial and politically motivated actors. This exposure requires Modon to continuously strengthen its cybersecurity posture to defend against sophisticated and evolving threats.

Given Modon's extensive infrastructure and interactions with various external partners, it is crucial to ensure security across all operations to maintain trust. Modon must be confident that there are no signs of compromise within its network, thereby maintaining its reputation among clients, partners, and internal teams.

Modon required a trusted cybersecurity provider with a strong track record of detecting advanced hidden cyber threats, as well as identifying historical compromises across complex digital landscapes. After reviewing several top-tier vendors, Modon settled on Kaspersky's Compromise Assessment service recognizing its team's expertise, thorough approach, broad service offerings, and commitment to high-quality results.

Kaspersky Compromise Assessment

Kaspersky Compromise Assessment is a service that focuses on uncovering active cyberattacks as well as previous unknown attacks that have flown under the radar of your IT security tools and processes. The goal of the service is to provide high level of assurance as to whether or not your network is compromised and evaluate the overall security posture with independent expert analysis.

Compromise assessment service

Kaspersky Compromise Assessment service proved to be the right solution for Modon's requirements. Due to Modon's extensive collaboration with industrial and government partners, the company needed a service that could identify signs of compromise across its entire network and quickly determine the source of an attack and its impact.

Key benefits of Kaspersky Compromise Assessment include:

Broad service offerings

Kaspersky Compromise Assessment service scope includes darknet search, threat hunting, initial incident response, and malware analysis.

Comprehensive endpoint analysis

In-depth inspection of all endpoints, using tool-assisted scanning and detailed forensic metadata collection.

Ongoing and past breach analysis

Complete assessment of information from existing security solutions, enhanced by a retrospective analysis of SIEM logs to uncover both ongoing and historical data breaches.

Accurate threat detection

Precise identification of both internal and external threats, enabling a comprehensive overview of the entire threat landscape powered by widely recognized, top-tier threat intelligence solution.

Deliverables

As a result of the **Kaspersky Compromise Assessment service**, Modon received a concise, well-structured report tailored to its needs: an executive summary of key findings, a detailed analysis of exploited vulnerabilities, attack sources, and impacted assets. With actionable recommendations included, the report provides Modon with critical insights to address current threats and strengthen defenses against future attacks.

Majid A. Bin Sawad

Cybersecurity Director, MODON

We were highly impressed by the comprehensive nature of Kaspersky's services and the expertise demonstrated by their entire team. This positive experience has prompted us to consider additional projects with Kaspersky in the future.

Mohamad Hashem

General Manager KSA & Bahrain,
Kaspersky

At Kaspersky, we sincerely thank MODON for selecting us to deliver the Compromise Assessment Service. This decision demonstrates MODON's strong commitment to maintaining robust cybersecurity and safeguarding critical assets. We value their trust in our capabilities and are excited to partner with MODON in achieving lasting success and resilience in the face of evolving cyber threats.

Outcomes

Kaspersky provided Modon with a clear understanding of the industry-specific threats they face, enhancing their confidence in their cybersecurity posture. Modon can now securely collect and share data with clients and partners, knowing their security infrastructure effectively controls and safeguards access.

With many of Modon's services delivered through online portals, ensuring zero disruption to operations was essential. **Kaspersky's Compromise Assessment**, which runs entirely in passive mode, aligned perfectly by operating with no impact on Modon's infrastructure.
